Ntirho POS

[DOCUMENT SUBTITLE]

NKATEKO MTHEMBI

[COMPANY NAME] | [Company address]

Background Information

This is an enterprise point of sale application designed to be adaptable to most POS business use cases.

Application modes:

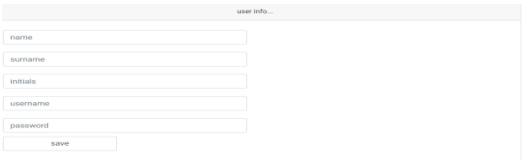

- Fast Foods.
- Restaurant.
- Supermarket.
- Garden centres.
- Laundromat.
- Bottle Store.

Application Overview.

- Username and password login page.
  User Manager module creates application users.
  Username and password are some of the options when creating the user.
- Landing page.
  This provides a graphical overview of the sales of the previous day.
- Main Menu.
  This provides menu of the sale items.
  This is a multi-level menu for logical categorization of the sale items.
  An option of item barcode scanning is provided for the supermarket mode of this application.
- Menu Manager.
  New Menu Items are created including specifying fast food item options and grocery item barcode.
- Client list.
  This is for food deliveries and collections. A database of clients is dynamically created.
- Reports.
  Daily items sold report, monthly reports.
  Any type of report can be added.
